Nic,

I reviewed the attachments, and I think they look reasonable and practical. Additionally (and more importantly), Jacqueline Fitch has also reviewed this in depth, and is in concurrence.

Jacqueline stated that the Vessel Removal Evaluation Datasheet is currently in D8 for review.

Subject: SOP

Hi All,

I've drafted a sop for the documentation of the vessel removal. I made some assumptions that will probably change after the EPA discusses things with the USCG. Take a look and let me know if this is doable. I've attached the Revised Vessel Recovery Field Data Sheet, Draft Documentation SOP, a sample photo log, and a photo placard that can be used in the photos to help identify the targets.

Subject: New NDOW Vessel Removal Briefing

All,

This morning, Jeff and I discussed how we are going to train the Coasties on how to use the new NDOW forms which contain the Vessel Removal evaluation. With Alpha vessel removal operations starting tomorrow, we both felt that it was a good idea that we were all on the same page first. With Bravo and Charlie demobing this week, this will be the last time we have face-to-face contact with the Coasties in those branches, and it's important to give clear and consistent messaging regarding how we want the forms filled out.

I will be taking a few minutes on the 8pm data call to explain the form to everyone the same way I will be explaining it to the Coasties tomorrow morning. Please feel free to ask any questions.

Thank you very much for your time.

Respectfully,
Cody Bingham
